### SUMMARY

I am a software developer with a life long love for working with computers. I enjoy learning new ways to use tools I am comfortable with, and am eager to learn new technologies.

### SKILLS

#### TECHNOLOGY

- JavaScript
- Node
- Express
- PostgreSQL
- GraphQL
- HTML/CSS
- React
- jQuery
- AJAX/Fetch
- Jest
- Enzyme
- Mocha & Chai
- Vim

#### PRACTICES

- Testing/TDD
- Git/Github
- Pair Programming

### PROJECTS

#### Spont

An iOS application that uses location data to recommend places to go

- Front end in React Native
- GraphQL Back end in Typescript and Express
- Tested with Jest

- Server repo: <https://github.com/botttd/spont-be/>

- Client repo: <https://github.com/botttd/spont>

#### Movie Tracker

Movie Tracker gathers the latest movie releases The Movie DB so that users can browse and add their favorite movies to their favorites list.

- Built with React and React Router
- Redux for state management
- Tested with Enzyme and Jest

- Repo: <https://github.com/botttd/movie-tracker>

#### SWAPI-Box

SWAPI or Star Wars API box gathers data from the public Star Wars API and displays it for the user.

- Built with React
- Tested with Enzyme and Jest

- Repo: <https://github.com/botttd/SWAPI-Box>

### EXPERIENCE
